DETAILED ACTION

The Remarks filed 2 September 2004 have been entered.

Response to Arguments

Applicant's arguments with respect to claims 1,9,19 and 32 have been fully considered and are persuasive. The rejection of claims 1-44 has been withdrawn.

Allowable Subject Matter

Claims 1-44 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

The best prior art of record discloses an organic light emitting device comprising an anode, a hole transporting layer over the anode, wherein the hole transporting layer is doped with a fluorescent material; an electron transporting layer over the hole transporting layer, wherein the electron transporting layer is doped with a fluorescent material; and a cathode over the electron transporting layer. However, the prior art fails to teach or fairly suggest an organic light emitting device comprising a hole transporting layer and an electron transporting layer wherein both layers are doped with a phosphorescent material, as claimed in claims 1,9,19 and 32. Claims 2-8,10-18,20-31 and 33-44 are allowable by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
